

AVT-371 Research Workshop on

“Materials and technologies for electro-optical camouflage”

Human sense at the centre of camouflage development

Saccone Julien, CEO , FRENCH

Date 22/05/2023

DESPITE THE ADVANCES IN TECHNOLOGIE, THE HUMAN SENSE REMAINS KEY

OUR AVAILABLE TOOLS FOR CAMOUFLAGE CREATION

COLORS

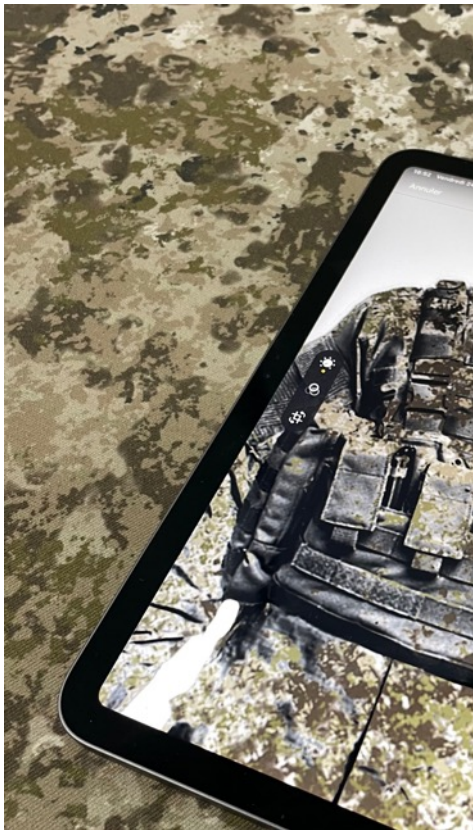

- Always need to be validated by the human eye

PATTERN

- Key for perfect concealment but can be done by a machine

SPECTRUM

- **Technology allows to trick the sensor and the operator**

3D EFFECT

- To create realistic effects

What does the SIGHT SENS offer ?

- Creation of camouflage for any type of environment by interpreting colours and shape
- It will always remain the final verification and approval tool

The touch

- **Makes the difference between true and false and recreates a texture**

The hearing

- **Silence is key for the success of any operation**

THE SMELL

- We leave our invisible print in the air and on the ground

NATURE SHOWS US THE WAY
