THE
SCIENCE
OF
WHERE

THE SCIENCE OF WHERE

*A Framework
and Process*

*Leveraging the Power of Geography and GIS. . .
to Make Better Decisions*

Import Data

Analyze & Visualize

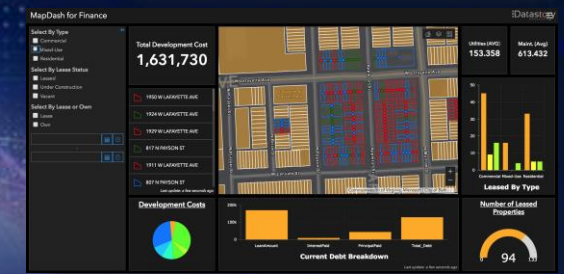

THE SCIENCE OF WHERE

Understanding

Collaborating

Informing

ArcGIS is a comprehensive Geospatial Platform

Open

Services Based

Distributed

Extendable

Supporting Individuals, Teams and Organizations

ArcGIS Integrates All Types of Data

All Information is managed as Enterprise Level Resource

GIS Brings the Power of Location to Everyone

Many Easy to Use and Out of the Box Apps

For use across Organizations and Beyond

ArcGIS is a Platform for National Security

integrating everyone through Web GIS...

Portal or ArcGIS Online

Live data from Sensors

Basemaps

Dynamic Overlays

Op/Admin Overlays

Server

Processors, Filters, Models & Analytics

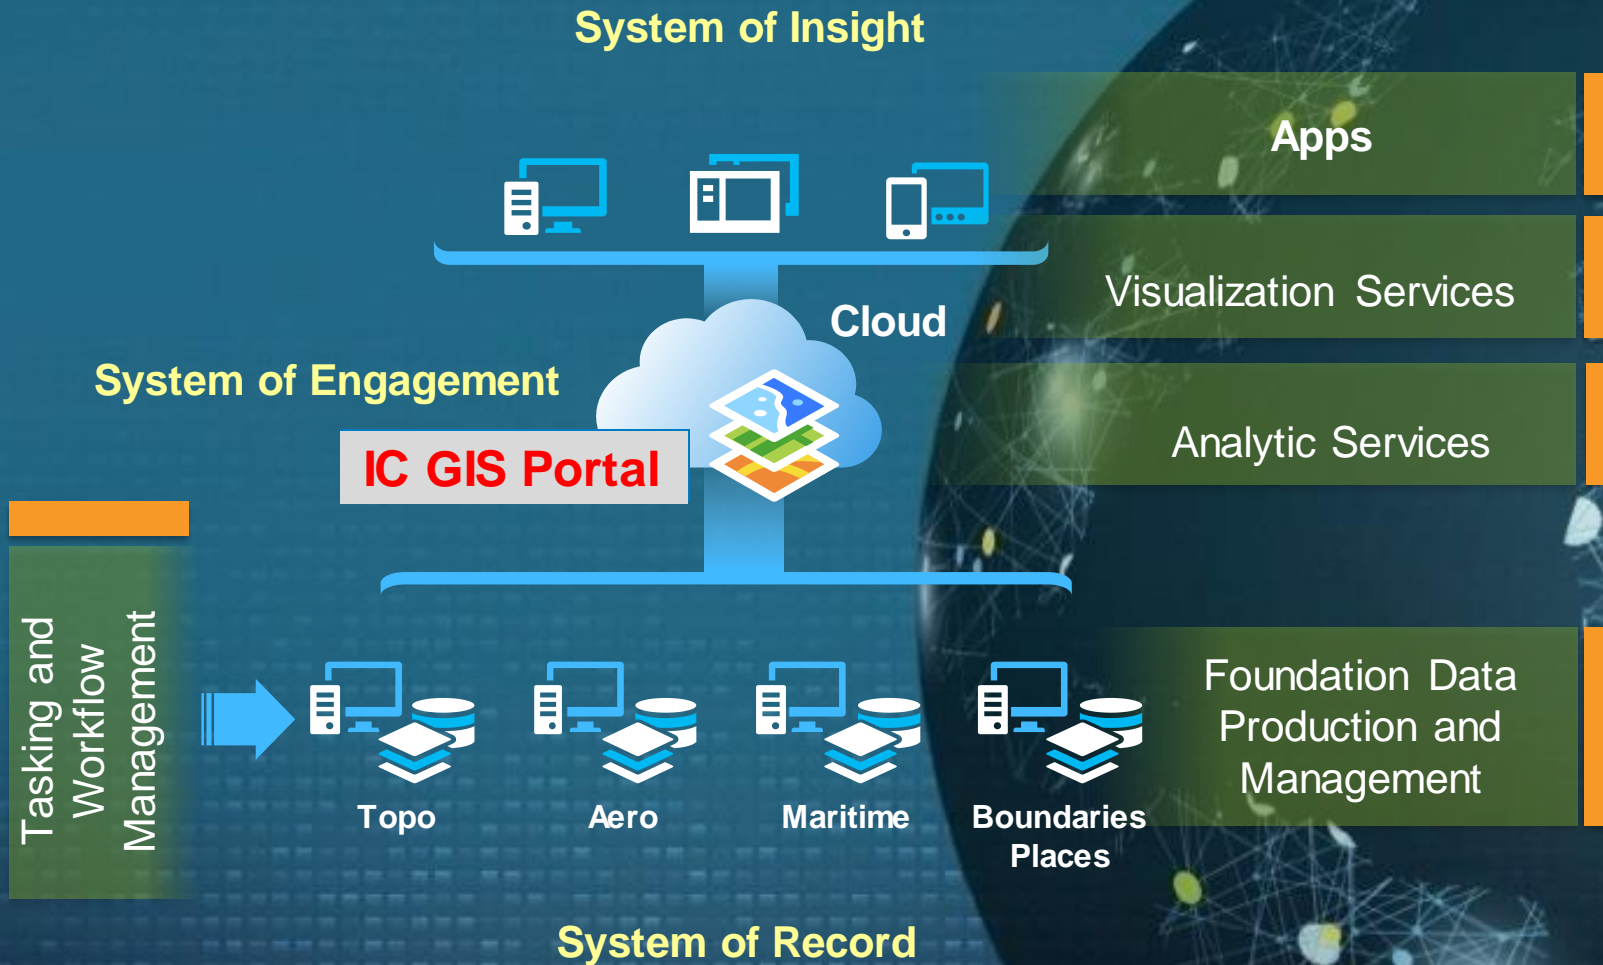

Geo-enabled Enterprise Systems

A Platform for the US GEOINT Community

Driving platform adoption across NGA and the larger IC

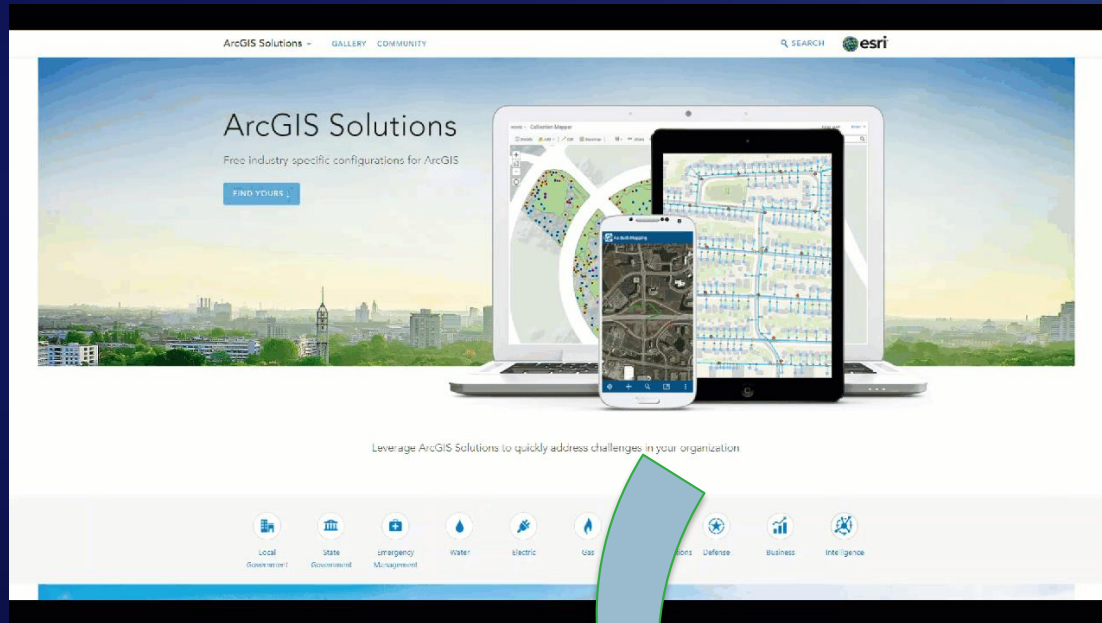

Increasing use of analysis

End-to-end on Esri technology

140,000 registered users

ArcGIS Solutions for Defense and Intelligence
