Standardisation for C2-Simulation Interoperation

(Standardisation pour l'interopération
SIC-simulation)

Final Report of MSG-085.

This document contains information authorized by NATO CSO for unlimited release and distribution. Any product or trademark identified in this document provides an example, not a recommendation. This document does not present the official policy of any participating nation organization. It consolidates principles and guidelines for improving the impact of Modelling and Simulation (M&S) as a lead Science and Technology (S&T) investment on military capabilities as well as Defence Against Terrorism (DAT) capabilities. All organizations are invited to use and benefit from such guidance.

The NATO Science and Technology Organization

Science & Technology (S&T) in the NATO context is defined as the selective and rigorous generation and application of state-of-the-art, validated knowledge for defence and security purposes. S&T activities embrace scientific research, technology development, transition, application and field-testing, experimentation and a range of related scientific activities that include systems engineering, operational research and analysis, synthesis, integration and validation of knowledge derived through the scientific method.

In NATO, S&T is addressed using different business models, namely a collaborative business model where NATO provides a forum where NATO Nations and partner Nations elect to use their national resources to define, conduct and promote cooperative research and information exchange, and secondly an in-house delivery business model where S&T activities are conducted in a NATO dedicated executive body, having its own personnel, capabilities and infrastructure.

The mission of the NATO Science & Technology Organization (STO) is to help position the Nations' and NATO's S&T investments as a strategic enabler of the knowledge and technology advantage for the defence and security posture of NATO Nations and partner Nations, by conducting and promoting S&T activities that augment and leverage the capabilities and programmes of the Alliance, of the NATO Nations and the partner Nations, in support of NATO's objectives, and contributing to NATO's ability to enable and influence security and defence related capability development and threat mitigation in NATO Nations and partner Nations, in accordance with NATO policies.

The total spectrum of this collaborative effort is addressed by six Technical Panels who manage a wide range of scientific research activities, a Group specialising in modelling and simulation, plus a Committee dedicated to supporting the information management needs of the organization.

- AVT Applied Vehicle Technology Panel
- HFM Human Factors and Medicine Panel
- IST Information Systems Technology Panel
- NMSG NATO Modelling and Simulation Group
- SAS System Analysis and Studies Panel
- SCI Systems Concepts and Integration Panel
- SET Sensors and Electronics Technology Panel

These Panels and Group are the power-house of the collaborative model and are made up of national representatives as well as recognised world-class scientists, engineers and information specialists. In addition to providing critical technical oversight, they also provide a communication link to military users and other NATO bodies.

The scientific and technological work is carried out by Technical Teams, created under one or more of these eight bodies, for specific research activities which have a defined duration. These research activities can take a variety of forms, including Task Groups, Workshops, Symposia, Specialists' Meetings, Lecture Series and Technical Courses.

MSG-085 Membership List	xvi
Executive Summary and Synthèse	ES-1
Chapter 1 – Introduction	1-1
1.1 Document Overview	1-1
1.2 Why Standardize C2SIM Interoperability?	1-1
1.3 Previous Work by NATO on Standardization for C2SIM Interoperation	1-3
1.3.1 NATO MSG-048	1-3
1.3.2 NATO MSG-079	1-4
1.4 C2SIM Interoperability	1-4
1.4.1 Coalition Battle Management Language (C-BML)	1-4
1.4.1.1 Practical Definition of C-BML	1-5
1.4.1.2 SISO C-BML Product Development Plan	1-6
1.4.1.3 C-BML Vocabulary and Grammar Considerations	1-9
1.4.1.4 C-BML Ontology	1-9
1.4.1.5 C-BML Development Process and Tools – From Phase 1 to Phase 2	1-10
1.4.2 Military Scenario Definition Language (MSDL)	1-11
1.4.3 Distributed Simulation Engineering and Execution Process (DSEEP)	1-11
Chapter 2 – MSG-085 Overview	2-1
2.1 Background	2-1
2.2 Objectives	2-1
2.3 Activities	2-2
2.3.1 Requirements Analysis	2-2
2.3.2 Lessons Learned and Recommendations	2-3
2.3.3 Demonstrations, Experimentation and Evaluation	2-3
2.3.4 Communication Events, Workshops and Symposia	2-3
2.4 MSG-085 Organisation	2-4
2.5 Common Interest Group (CIG) Approach	2-4
2.5.1 Common Interest Group Organisation	2-5
2.5.2 MSG-085 Common Interest Groups	2-5

2.5.2.1	MSG-085 Autonomous Air Operations (AAO) CIG	2-6
2.5.2.2	MSG-085 Land Operations CIG	2-7
2.5.2.3	MSG-085 Maritime Operations CIG	2-8
2.5.2.4	MSG-085 Joint Mission Planning CIG	2-8
2.5.2.5	Technical MSDL/C-BML Messaging Infrastructure CIG	2-10

Chapter 6 – Lessons Identified and Lessons Learned **6-1**

6.1	Variability of C2SIM Interoperation Requirements (LL)	6-1
6.2	Combined Standard Scenario Definition, Initialisation and Execution (LL)	6-2
6.2.1	C2SIM Core (LI)	6-3
6.2.2	Need to Create Unified C2SIM Standard (LL)	6-3
6.2.3	Standardising Core Data Model versus Schema (LI)	6-3
6.2.4	C2SIM Standard Extensibility (LI)	6-4
6.2.5	C2LG Tasking Grammar (LL)	6-4
6.2.5.1	Pragmatic Approach (LL)	6-4
6.2.6	Advanced Grammar Approaches (LI)	6-5
6.2.6.1	Production Rules versus Business Rules (LI)	6-5
6.2.6.2	Lexical Functional Grammar Approaches (LI)	6-6
6.3	Need to Formally Manage Standard Products (LL)	6-6
6.3.1	Maintain Logical Data Model, Generate Derived Products (LL)	6-6
6.3.2	Standardisation of the Process and Production Chain (LL)	6-7
6.4	C2SIM Infrastructure Lessons Learned (LL)	6-7
6.4.1	Supportability of Coalition C2SIM Interoperation (LL)	6-7
6.4.2	Distributed Use of Coalition C2SIM Interoperation (LL)	6-7
6.4.3	Combining Various Versions of MSDL/C-BML (LI)	6-8
6.5	Need a C2SIM DSEEP Overlay (LI)	6-8
6.5.1	A Standardised Process for the Use of MSDL/C-BML for Building C2SIM Federations	6-8
6.5.2	Stakeholders Include Both C2 and Simulation Communities (LI)	6-8
6.5.3	End-Users' Perception of Federation Execution (LI)	6-9
6.5.4	C2SIM Reference Architecture, Services (LI)	6-9

6.5.5	Time Management (LI)	6-10
6.6	Future Requirements for C2SIM Interoperation (LI)	6-10
6.6.1	Ontology and Business Rules (LI)	6-10
6.6.1.1	Validation and Construction (LI)	6-10
6.6.1.2	Message Correction (LI)	6-10
6.6.1.3	Message Conversion (LI)	6-11
6.6.1.4	Specifying Task Qualifiers, Triggers and other Criteria (LI)	6-11
6.7	Validation of Operational Relevance (LL)	6-11
6.7.1	C2-to-C2 Exchanges (LL)	6-11
6.7.2	Logistic Domain (LL)	6-12
6.7.3	Acknowledgments (LL)	6-12
6.8	Need for Increased Stakeholder Involvement (LI)	6-12
6.8.1	Challenges to Engage Industry (LI)	6-12
6.8.2	Employment of C2SIM Interoperability Technologies (LI)	6-12
6.8.3	Need for NATO Lecture Series (LL)	6-13
6.9	Requirement for a Funded Development Activity (LI)	6-13
Chapter 7 – Conclusions and Recommendations		7-1
7.1	Operationalise MSDL and C-BML Standards	7-1
7.2	Educate Broader Community on C2SIM Technology Employment	7-1
7.3	Advance C2SIM Interoperability	7-2
7.4	Support Next Generation of C2SIM Interoperability Standards Development	7-2
Chapter 8 – References		8-1
Annex A – MSG-085 External Event Agendas and Posters		A-1
A.1	April 2011 – BML Research Symposium	A-1
A.2	I/ITSEC 2011 Demonstration	A-2
A.3	September 2012 – BML Symposium Agenda	A-3
A.4	November 2012 – CIG Workshop	A-5
A.5	December 2012 – I/ITSEC Demonstration	A-6
A.6	MSG-119 C2SIM Interoperability Workshop	A-7

Acknowledgements

The authors wish to express their acknowledgements first and foremost to CSO and NMSCO who were very supportive throughout the execution of the MSG-085 Technical Activity (TA). They provided helpful recommendations, materials and facilities to perform demonstrations during multiple international events, including the means to advertise these demonstrations and thereby reach a large audience of key stakeholders. This support was beneficial and key to the TA success.

The successful completion of the TA is also due to the real involvement of military organizations and experts who shared their knowledge and experience with the other TA members in order to augment the operational relevance and rationales of C2SIM interoperability. Special thanks go to the United States Mission Command Battle Laboratory who offered to host the final TA demonstration and provided a team of senior military experts to support this event.

Finally, the involvement of the MSG-085 Technical Group members also was significant in meeting the TA objectives and achievements. Their considerable technical contribution allowed for defining a C2SIM exchange infrastructure. Also, the extensive work performed by the group to adapt national systems during demonstration preparation was key to demonstrating the benefits of C2SIM interoperability over a great number of events that targeted large audiences.

14. Abstract	<p>The interoperation between Command and Control (C2) systems and simulation systems is a common theme in the transformation of modern military forces. This is required to support the military enterprise in the execution of business activities and mission threads such as forces readiness, decision support and acquisition. This implies the ability to seamlessly integrate C2 and simulation systems and to provide the means for a meaningful and unambiguous information exchange. This applies to systems of systems functioning toward a common goal at different levels: 1) within services; 2) across services; (i.e. joint) and 3) across Nations in a multi-national or coalition context.</p> <p>In 2010, the NATO Research and Technology Organization started the three-year Modeling and Simulation Task Group "Standardisation for C2-Simulation Interoperation" to assess and document the C2 and Simulation interoperability standards developed by SISO to be used for multiple military applications. This final report documents the completed work of this Task Group, designated MSG-085. It includes the continued progress made to demonstrate the utility of C2-Simulation interoperability. This report leverages the knowledge of C2-Simulation experts to merge current standards towards a unified, more manageable and easier to deploy C2SIM interoperability.</p>

DIFFUSION DES PUBLICATIONS
STO NON CLASSIFIEES

Les publications de l'AGARD, de la RTO et de la STO peuvent parfois être obtenues auprès des centres nationaux de distribution indiqués ci-dessous. Si vous souhaitez recevoir toutes les publications de la STO, ou simplement celles qui concernent certains Panels, vous pouvez demander d'être inclus soit à titre personnel, soit au nom de votre organisation, sur la liste d'envoi.

Les publications de la STO, de la RTO et de l'AGARD sont également en vente auprès des agences de vente indiquées ci-dessous.

Les demandes de documents STO, RTO ou AGARD doivent comporter la dénomination « STO », « RTO » ou « AGARD » selon le cas, suivi du numéro de série. Des informations analogues, telles que le titre et la date de publication sont souhaitables.

Si vous souhaitez recevoir une notification électronique de la disponibilité des rapports de la STO au fur et à mesure de leur publication, vous pouvez consulter notre site Web (<http://www.sto.nato.int/>) et vous abonner à ce service.

**DISTRIBUTION OF UNCLASSIFIED
STO PUBLICATIONS**

AGARD, RTO & STO publications are sometimes available from the National Distribution Centres listed below. If you wish to receive all STO reports, or just those relating to one or more specific STO Panels, they may be willing to include you (or your Organisation) in their distribution.

STO, RTO and AGARD reports may also be purchased from the Sales Agencies listed below.

Requests for STO, RTO or AGARD documents should include the word 'STO', 'RTO' or 'AGARD', as appropriate, followed by the serial number. Collateral information such as title and publication date is desirable.

If you wish to receive electronic notification of STO reports as they are published, please visit our website (<http://www.sto.nato.int/>) from where you can register for this service.
